THIS PROSPECTUS SHOULD BE READ CAREFULLY BEFORE INVESTING AND RETAINED FOR FUTURE REFERENCE.

SUN LIFE PROSPERITY PHILIPPINE STOCK INDEX FUND, INC.
(A corporation organized under Philippine laws)

This Prospectus relates to the offer of 4,000,000,000 shares of the Sun Life Prosperity Philippine Stock Index Fund, Inc. (the "Fund") pursuant to the increase in its authorized capital stock ("ACS") from 1,900,000,000 shares to 4,000,000,000 shares as approved by the Securities and Exchange Commission ("SEC") on February 05, 2018. The additional shares of 2,100,000,000, with a par value of PHP0.01 per share will be sold at the current Net Asset Value Per Share ("NAVPS"). The total number of shares outstanding after the offer, if all the Offer Shares were subscribed as of October 31, 2019 is 4,000,000,000 shares.

Total gross proceeds of the 4,000,000,000 Offer Shares, are estimated at PHP 4,087,200,000 (computed by multiplying 4,000,000,000 Offer Shares by PHP1.0218 NAVPS as of October 31, 2019).

The net proceeds from the sale of securities will be used to invest in common stocks that comprise the market benchmark, the Philippine Stock Exchange Index (PSEi), as well as other cash and/or money market instruments. The Fund's investment objective is to closely track the performance of its market benchmark (PSEi) by investing in these equity securities in the same proportion/weighting of the securities as it bears to the benchmarked index. For a more detailed discussion, please refer to the section entitled "Use of Proceeds".

The Offer Shares are being offered in the Philippines through Sun Life Asset Management Company, Inc. ("SLAMCI"). SLAMCI is being paid the following fees: (a) as the Fund's adviser and manager, an annual fee of up to 0.50% of Assets Under Management ("AUM"), estimated at PHP 63,197,798.98 per annum, inclusive of VAT; and (b) as the Fund's distributor, an annual fee of up to 0.50% of AUM, estimated at PHP 63,197,798.98 per annum, inclusive of VAT. For a more detailed discussion on the Investment Company Adviser, please refer to the section entitled "Plan of Distribution".

All of the offered shares are common shares, voting with identical rights and privileges, and may be owned by any person or entity, regardless of nationality. The shares are eligible for payment of dividends, which depends, among other factors, upon the Fund's unrestricted retained earnings, cash flow and financial condition.

The Board of Directors of the Fund has the power to fix and determine the amount to be reserved or provided for declaration and payment of dividends from the Fund's unrestricted retained earnings. The amount of such dividends (either in cash, stock, property or a combination of the foregoing) will depend on the Fund's profits, cash flows, capital expenditure, financial condition, and other factors, and will follow SEC's guidelines on determining retained earnings available for dividend declaration. The existence of surplus profit is a condition precedent before a dividend can be declared. The surplus profits or income must be a bona fide income founded upon actual earnings or profits. Actual earnings or profits shall be the net income for the year based on the Audited Financial Statements, adjusted for unrealized items, which are considered not available for dividend declaration. Taking into account the Fund's cash flows, capital expenditure, investment objective and financial condition, at least 10% of the actual earnings or profits may be declared by the Board of Directors as dividends.

Cash dividends and property dividends may be declared by the Board of Directors and no stockholder approval is required. Stock dividends paid on the Offer Shares are subject to approval by both the Board of Directors and the stockholders representing at least two-thirds (2/3) of the outstanding capital stock of the Fund at a stockholders' meeting called for such purpose.

Under the Corporation Code, corporations with surplus profit in excess of 100% of its paid-in capital are required to declare dividends (cash or stock) and distribute it to its stockholders.

Dividends so declared will be automatically reinvested in additional shares on behalf of the shareholders, without sales charges, at the NAVPS on the payment date established for such dividends. As such, shareholders realize their gains when shares are redeemed. Shareholders may also elect not to have dividends reinvested and receive payment in cash, net of tax.

The Fund shall not participate in any underwriting or selling group in connection with the public distribution of securities, except for its own capital stock.

Unless otherwise stated, the information contained in this Prospectus has been supplied by the Fund, which accepts full responsibility for the accuracy of the information and confirms, having made all reasonable inquiries, that to the best of its knowledge and belief, there are no material facts the omission of which would make any statement in this Prospectus misleading in any material respect. Neither the delivery of this Prospectus nor any sale made hereunder shall, under any circumstances, create any implication that the information contained herein is correct as of any time subsequent to the date hereof.

ALL REGISTRATION REQUIREMENTS HAVE BEEN MET AND ALL INFORMATION CONTAINED IS TRUE AND CURRENT.

SUMMARY

The following summary is qualified in its entirety by the more detailed information appearing elsewhere in this Prospectus. Certain terms used herein are defined under "Glossary".

THE FUND

The Fund is a Philippine corporation registered as an open-end investment company under R. A. 2629 and R. A. 8799, on December 23, 2014 under SEC Registration No. CS201424698. The Fund's investment objective is to generate long-term capital growth by tracking the performance of the Philippine Stock Exchange Index (PSEi). The investment policy is to invest primarily in common stocks that comprise the PSEi and in cash and/or money market instruments.

Open-end mutual fund companies in the Philippines are organized as stock corporations. The Fund may become fully subscribed at any point in time. In such case, the Fund would continue to accept deposits for future subscription ("DFFS") in anticipation of an increase in capital, subject to the requirements of the law and regulations on the same. The DFFS accepted would be earmarked for the issuance of the appropriate number of shares that the DFFS would have purchased as of date of acceptance. Upon approval of the increase in authorized capital stock and upon registration of the new shares resulting therefrom with the Securities and Exchange Commission, the Fund would release the shares equivalent to the DFFS accepted, according to the "first in, first out" rule.

RISK DISCLOSURE STATEMENT

I. GENERAL WARNING

The price of securities can and does fluctuate, and any individual security may experience upward or downward movements, and may even become valueless. There is an inherent risk that losses may be incurred rather than profit made as a result of buying and selling of securities.

Past performance is not a guide to future performance.

There is an extra risk of losing money when securities are bought from smaller companies. There may be a big difference between the buying price and the selling price of these securities.

An investor deals in a range of investments each of which may carry a different level of risk.

II. PRUDENCE REQUIRED

The risk of disclosure does not purport to disclose all the risk and other significant aspects of investing in these securities. An investor should undertake his own research and study on the trading of securities before commencing any trading activity. He may request information on the securities and issuer thereof from the Commission, which are available to the public.

III. PROFESSIONAL ADVICE

The investor should seek professional advice if he is uncertain or has not understood any aspect of the securities or the nature of risks involved in trading of securities, especially high-risk securities.

RISK FACTORS

The Fund Manager's overall risk management framework establishes policies, operating guidelines, risk tolerance limits and practices for risk management. Its risk management program is designed to:

- avoid risks that could materially affect the value of the Fund,
- contribute to sustainable earnings,
- take risks that the Fund can manage in order to increase returns, and
- provide transparency of the Fund's risks through internal and external reporting.

The Fund is in the business of accepting risks for appropriate return and takes on those risks that meet its investment objectives. The program design aligns risk management with the Fund's vision and strategy and embeds it within the business management practices of the business groups. In pursuing its investment objectives, the Fund Manager is responsible for ensuring that all significant risks are appropriately identified, assessed, managed, reported and monitored.

The Board of Directors of the Fund is ultimately responsible for ensuring that risk management policies and practices are in place. The Board has oversight role with respect to ensuring the identification of major areas of risk and development of strategies to manage those risks, and to review compliance with risk management policies implemented by the Fund. The Fund's Risk Officer reports to the audit and compliance committee of the Board of Directors. Her duties and responsibilities include, among others:

- Monitoring the investments of the Fund to ensure that all identified gaps in management's risk and management processes are resolved on a timely basis;
- Provide leadership to facilitate management's understanding of the risk management framework, policies and processes;
- Ensuring that the Philippine risk management organization is appropriately staffed with individuals who have the requisite skills and competencies, and that the organization structure and reporting relationships are appropriate and sufficiently independent;
- Organizing and participating in the risk workshops of the annual risk identification process; ensuring that business units identify plausible risk scenarios;
- Ensuring that risk-based measurement and reporting metrics, including risk limits and exception reporting are established; assigning risk category to the final risk lists;
- Providing expertise in the development of action plans to address the risks identified;
- Reviewing and updating the risk report quarterly; identifying and escalating as appropriate any missed target dates for key risk action plans; and
- Providing documented quarterly status updates on key risks to the Audit and Compliance Committee.

Key Risk Processes

The Fund has established a formal risk identification program whereby key risks that may impact its business are identified. Exposure to these risks is assessed on a qualitative and quantitative basis. Risk control programs and action plans are established for mitigating the exposure.

The Fund has adopted risk management policies to provide a consistent approach to measurement, mitigation and control, and monitoring of risk exposures.

Risk Categories

The Company's activities expose it to a variety of operational and financial risks such as market risk (which includes interest rate risk and equity price risk), credit risk, foreign exchange risk, fund manager risk, dilution risk, liquidity risk, large transaction risk, non-guarantee, regulatory risk, and operational risk.

Equity Risk: Companies issue equities, or stocks, to help finance their operations and future growth. A company's performance outlook, market activity and the larger economic picture influence its stock price. When the economy is expanding, the outlook for many companies will be positive and the value of their stocks should rise. The opposite is also true. The value of a Fund is affected by changes in the prices of the stocks it holds. The risks and potential rewards are usually greater for small companies, start-ups,

resource companies and companies in emerging markets. This risk is inherent to all equity-laced funds. However, the Index Fund may only be invested in stocks which make up the Philippine Stock Exchange Index (PSEi), limiting allocation to a fixed basket of thirty (30) common stocks of listed companies. These are carefully selected to represent the general movement of the Philippine stock market.

The selection of these companies is based on a specific set of criteria. Under the revised policy on index management, companies should meet three (3) criteria to qualify under the PSEi:

1. The company's free float level must be at least 15%.
2. The company must rank among the top 25% in terms of median daily value in nine out of the twelve-month period in review.
3. Ranking of Top 30 qualified companies based on full market capitalization.

Index Risk: The performance of the Fund may not precisely duplicate the performance of the benchmark index being used. The Fund may rebalance the portfolio to account for changes in the composition or valuation of the stocks within the index. This creates the possibility of a marked difference between the Fund's performance and that of the index. Lacking active risk management, the Fund is fully exposed to all of the changes to the market benchmark, the Philippine Stock Exchange Index (PSEi). Considering that this risk is inherent to the Fund, investors must be fully aware of it prior to investing.

Market Risk: Stock prices rise and fall. The carrying value of the Fund's investments in other corporate stocks depends on the value at which the stocks have been traded at the stock market as at the end of a particular day. The risk is minimized by closely monitoring the Fund's tracking error and establishing certain exposure limits.

Fund Manager Risk: The performance of the Funds is also dependent on the Fund Manager's skills. Hence, the Fund may underperform in the market and/or in comparison with similar funds due to investment decisions made by the Fund Manager, and may also fail to meet the Fund's investment objectives. The Board of Directors of the Fund, however, shall ensure that all investment policies and restrictions enumerated in this Prospectus are strictly followed.

Liquidity Risk: The Fund is usually able to service redemptions of investors within seven (7) banking days after receipt of the notice of redemption by paying out redemptions from available cash or near cash assets in its portfolio. However, when redemptions exceed the Funds available cash or near cash assets in its portfolio, the Fund will have to sell its other security holdings; and during periods of extreme market volatility, the Fund may not be able to find a buyer for such assets. Consequently, the Fund may not be able to generate sufficient cash from its sale of assets to meet the redemptions within the normal seven (7) banking day period. To mitigate this, the Fund maintains adequate highly liquid assets in the form of cash, cash equivalents and near cash assets in its portfolio.

Dilution Risk: Being an open-end mutual fund, various investors may effectively subscribe to any amount of shares of the Fund. As such, investors face the risk of their investments being diluted by the shares of the other investors of the Fund. The influence that the investors can exert over the control and management of the Fund decreases proportionately. To mitigate the risk, the Fund may impose single investor limits to the ownership of the fund, when necessary. This limits the extent to which any single investor can exercise control of the Fund. The Fund may also impose an anti-dilution levy or fee for significant orders, to protect the interest of the remaining investors of the Fund, when necessary.

Large Transaction Risk: If an investor in a Fund makes a large transaction, the Fund's cash flow may be affected. For example, if an investor redeems a large number of shares of a Fund, that Fund may be forced to sell securities at unfavorable prices to pay for the proceeds of redemption. This unexpected sale may have a negative impact on the net asset value of the Fund. To mitigate this risk, the Fund may impose single investor limits to the ownership of the fund, when necessary. This limits the extent to which redemptions from any single investor can impact the Fund's cash flow. The Fund may also impose an anti-

dilution levy or fee for significant orders, to protect the interest of the remaining investors of the Fund, when necessary.

Non-Guarantee: Unlike deposits made with banks, an investment in the Fund is neither insured nor guaranteed by the Philippine Deposit Insurance Corporation ("PDIC"). Hence, investors carry the risk of losing the value of their investment, without any guarantee in the form of insurance. Moreover, as with any investment, it is important to note that past performance of the Fund does not guarantee its future success.

Regulatory Risk: The Fund's investments and operations are subject to various regulations affecting among others, accounting of assets and taxation. These regulations occasionally change, and may result in lower returns or even losses borne by the investors. For example, a higher tax imposed on the sale or purchase of underlying assets of the Fund may result in lower net asset value of the Fund. To mitigate this risk, SLAMCI adopts global best practices. Further, it maintains regular communications with the relevant government agencies to keep itself abreast of the issues giving them concern, and to have the opportunity to help them set standards for good governance. SLAMCI also takes an active participation in the Philippine Investment Funds Association, Inc. ("PIFA"), an association of mutual fund companies in the Philippines.

Operational Risk: This is the risk of loss resulting from inadequate or failed internal processes, controls, people and systems. Categories of operational risks may fall under: sales and distribution, human resources, information technology, processes and people, accounting and finance, model risk, legal and regulatory and third party relationships. The Fund ensures that internal controls and practices are consistent with enterprise wide policies supporting the management of operational risks. The Fund has established business specific guidelines. Comprehensive investment program, including appropriate levels of self-insurance, is maintained to provide protection against potential losses.

Passive Management Risk: The Fund is a passively managed fund. Passively managed funds would not sell a security if the security's issuer was in financial trouble, unless the security is removed from the applicable index being replicated. The passively managed fund must continue to invest in the securities of the index, even if the index is performing poorly. That means the passively managed fund won't be able to reduce risk by diversifying its investments into securities listed on other indices. As a result, the performance of a passively managed fund may differ significantly from the performance of an actively managed fund.

The above risk factors are by no means exhaustive. New and/or unidentified risks may arise given the fast changing financial markets and economic environment.

CLASSIFICATION OF THE FUND INTO HIGH, MODERATE OR LOW RISK INVESTMENT; PROSPECTIVE INVESTORS

The Fund will predominantly be exposed to equity securities, comprising the Philippine Stock Exchange Index (PSEi) in its portfolio, and typically are high-risk investments. However, the Fund will be passively-managed, which means that the portfolio endeavors to replicate the components and the performance of the benchmark index. Furthermore, a minimal portion will be maintained in cash and cash equivalents for liquidity purposes. The Fund is for retail and corporate investors, and is classified as an aggressive investment.

CONFLICT OF INTEREST POLICY

The Fund Manager and its employees are prohibited from engaging in fraudulent, deceptive or manipulative conduct. The interests of the Fund and its employees must never conflict with or appear to conflict with those of the Fund and its stakeholders. Where such a situation may arise, the Fund Manager will seek to ensure that all stakeholders are treated fairly, and that Fund Manager employees act in the best interests of each stakeholder.

The Fund Manager and its employees are required to take reasonable steps to identify and disclose existing material conflicts of interest as well as material conflicts of interest that would be expected to arise between the Fund Manager and the Fund. The Fund Manager must respond to such conflicts by avoiding or otherwise controlling the conflict, and by disclosing such conflicts to the Fund.

Competition

The Fund principally competes directly with other mutual funds in the Philippines and with the Unit Investment Trust Funds ("UITFs") offered by commercial banks, in terms of returns and the associated risks of the return. Effect of Existing or Probable Governmental Regulations on the Business

Senate and congressional bills amending R. A. 2629, which is the main law that regulates the mutual fund industry, have been filed. The most prominent of these are the bills on the proposed Collective Investment Schemes Law ("CISL"). One of the noteworthy provisions of the CISL bills is the exemption of mutual fund companies from certain requirements of the Corporation Code as regards increasing ACS. If passed into

law, this would be of possible benefit to the mutual fund companies which, with their numerous stockholders, find it difficult to obtain the votes of stockholders representing at least 2/3 of the outstanding capital stock to approve certain corporate actions. SLAMCI, through PIFA, participates in the hearing and deliberation of the CISL bill. SLAMCI expects the regulatory environment to improve with the passage of the CISL bill to the benefit of investors.

Major Risks Involved in the Business of the Fund

For a detailed discussion on the major risks involved in the business of the Fund, including procedures undertaken to identify, assess and manage such risks, please see "Risk Factors."

SLAMCI reserves the right to approve or deny a shareholder's application for certain privileges according to the criteria it has set. These privileges may be revised or discontinued by SLAMCI at any time.

1. Waiver of Front End Sales Load (Option A) for qualified investors

This privilege may be extended only to partial redemptions and is not applicable to full redemptions of back-end investments. Redemption in excess of the allowed 10% will be subject to regular Back-End fees.

This one-time privilege per year is not automatic and should be exercised by the investor. Free redemption entitlement is not cumulative. Unexercised entitlement cannot be carried forward to future redemptions within the same year or succeeding calendar years.

If redeemed after 3 years, the investment shall no longer be subject to any redemption fee.

Dividends

The Board of Directors of the Fund has the power to fix and determine the amount to be reserved or provided for declaration and payment of dividends from the Fund's unrestricted retained earnings. The amount of such dividends (either in cash, stock, property or a combination of the foregoing) will depend on

the Fund's profits, cash flows, capital expenditure, financial condition, and other factors and will follow SEC's guidelines on determining retained earnings available for dividend declaration. The existence of surplus profit is a condition precedent before a dividend can be declared. The surplus profits or income must be a bona fide income founded upon actual earnings or profits. Actual earnings or profits shall be the net income for the year based on the audited financial statements, adjusted for unrealized items, which are considered not available for dividend declaration. Taking into account the Fund's cash flows, capital expenditure, investment objective and financial condition, at least 10% of the actual earnings or profits may be declared by the Board of Directors as dividends.

Dividends so declared will be automatically reinvested in additional shares on behalf of the shareholders, without sales charges, at the NAVPS on the payment date established for such dividends. As such, Shareholders realize their gains when shares are redeemed. Shareholders may elect not to have dividends reinvested and receive payment in cash, net of tax.

Top Five Key Performance Indicators

The performance of a fund is important to its investors. Oftentimes, it is used when making investment decisions. That is why Key Performance Indicators (KPI), a set of quantifiable measures, is necessary to gauge its performance in terms of meeting the Fund's investment objective while consistently following its investment policy.

I. Total Return

The performance of a Mutual Fund is always expressed in terms of its total return, which is the sum of the change in a Fund's net asset value (NAV), its dividends and its capital gains distributions over a given period of time, net of its expenses.

II. Market Conditions

A fund's true performance potential needs to be evaluated within the context of the market environment prevailing during the different periods used.

It is most relevant to investors to measure the performance of a fund within a 10-year time frame as it will most likely cover a mix of market conditions that may be translated into a more reliable long-term indicator of the Fund Manager's investment management abilities.

III. Benchmarks

Benchmarking is one of the most important aspects of a mutual fund's total return performance. A fund's performance metrics only have meaning if they are compared to appropriate "guideposts," or benchmarks.

As for the Fund, considering that it is primarily invested in stocks listed in the Philippine Stock Exchange (PSE), its performance is measured against the Philippine Stock Exchange Index (PSEi). The PSEi is the main index of the PSE and is the most watched index among the six PSEi Series. It measures the relative changes in the free float-adjusted market capitalization of the 30 largest and most active common stocks listed at the PSE, thereby providing an overview of the market's overall condition.

Total Return vs. Benchmark

| | Benchmark: Philippine Stock Exchange Index (PSEi) | Sun Life Prosperity Philippine Stock Index Fund |
|---------------|---|---|
| 3-Year Return | 1.96% | 2.23% |
| 1-Year Return | 6.90% | 7.01% |
| YTD Return* | 4.19% | 4.56% |

* As of September 30, 2019

IV. Peer Comparisons

Mutual funds are also compared to their peers, or peer groups, and relevant fund categories. For example, it is common for investment research materials to compare a stock fund, like the Sun Life Prosperity Philippine Stock Index Fund, to funds similar in nature (peers or peer group). While this information is made available to the Fund's investor, the same may be found in the website of the Investment Company Association of Philippines at www.pifa.com.ph.

Comparative Returns

| | Philippine Stock Index Fund | Philequity PSE Index Fund | PAMI Equity Index Fund |
|---------------|-----------------------------|---------------------------|------------------------|
| 3-Year Return | 2.44% | 2.77% | 0.39% |
| 1-Year Return | 7.46% | 7.43% | 6.31% |
| YTD Return* | 4.83% | 4.91% | 4.02% |

*As of September 30, 2019

V. Asset Size

Open-ended mutual funds grow their asset size in two ways:

- Increase in the value of the underlying assets as a result of the strong performance of equity securities and/or bonds in the fund's portfolio. When the underlying assets in a portfolio increase in value, the fund's asset size increases.
- The inflow of investors' money. This is why a fund's asset size will continue to grow even if it has a negative return.

The increase in a fund's asset size signifies solid fund management skills which combined with favorable market conditions backed by a strong economic outlook illustrates how effectively a fund manager has performed and the extent to which value has been added through active management.

The second indicates investor confidence in the fund manager, the company, or both.

Most analysts check whether the performance of a mutual fund is attributable to personnel who have since left the fund. While there is no magic number when it comes to fund manager tenure, it should provide some investor comfort to know that with respect to the Fund, the Fund Manager and the Fund's top management have been with the Fund for at least 5 years. Furthermore, the Company, having been in the business for decades combined with a record of consistent strong performance indicates a stability and resilience capable of withstanding the different stages of the business cycle.
