## **RISK DISCLOSURE STATEMENT**

### **I. GENERAL WARNING**

The price of securities can and does fluctuate, and any individual security may experience upward or downward movements, and may even become valueless. There is an inherent risk that losses may be incurred rather than profit made as a result of buying and selling of securities.

Past performance is not a guide to future performance.

There is an extra risk of losing money when securities are bought from smaller companies. There may be a big difference between the buying price and the selling price of these securities.

An investor deals in a range of investments each of which may carry a different level of risk.

### **II. PRUDENCE REQUIRED**

The risk of disclosure does not purport to disclose all the risk and other significant aspects of investing in these securities. An investor should undertake his own research and study on the trading of securities before commencing any trading activity. He may request information on the securities and issuer thereof from the commission, which are available to the public.

### **III. PROFESSIONAL ADVICE**

The investor should seek professional advice if he is uncertain or has not understood any aspect of the securities or the nature of risks involved in trading of securities, especially high-risk securities.

## **RISK FACTORS**

The Fund Manager's overall risk management framework establishes policies, operating guidelines, risk tolerance limits and practices for risk management. Its risk management program is designed to:

- avoid risks that could materially affect the value of the Fund,
- contribute to sustainable earnings,
- take risks that the Fund can manage in order to increase returns, and
- provide transparency of the Fund's risks through internal and external reporting.

The Fund is in the business of accepting risks for appropriate return and takes on those risks that meet its investment objectives. The program design aligns risk management with the Fund's vision and strategy and embeds it within the business management practices of the business groups. In pursuing its investment objectives, the Fund Manager is responsible for ensuring that all significant risks are appropriately identified, assessed, managed, reported and monitored.

The Board of Directors of the Fund is ultimately responsible for ensuring that risk management policies and practices are in place. The Board has oversight role with respect to ensuring the identification of major areas of risk and development of strategies to manage those risks, and to review compliance with risk management policies implemented by the Fund. The Fund's Risk Officer reports to the audit and compliance committee of the Board of Directors. Her duties and responsibilities include, among others:

- Monitoring the investments of the Fund to ensure that all identified gaps in management's risk and management processes are resolved on a timely basis;
- Provide leadership to facilitate management's understanding of the risk management framework, policies and processes;

- Ensuring that the Philippine risk management organization is appropriately staffed with individuals who have the requisite skills and competencies, and that the organization structure and reporting relationships are appropriate and sufficiently independent;
- Organizing and participating in the risk workshops of the annual risk identification process; ensuring that business units identify plausible risk scenarios;
- Ensuring that risk-based measurement and reporting metrics, including risk limits and exception reporting are established; assigning risk category to the final risk lists;
- Providing expertise in the development of action plans to address the risks identified;
- Reviewing and updating the risk report quarterly; identifying and escalating as appropriate any missed target dates for key risk action plans; and
- Providing documented quarterly status updates on key risks to the audit and compliance committee.

### **Key Risk Processes**

The Fund has established a formal risk identification program whereby key risks that may impact its business are identified. Exposure to these risks is assessed on a qualitative and quantitative basis. Risk control programs and action plans are established for mitigating the exposure.

The Fund has adopted risk management policies to provide a consistent approach to measurement, mitigation and control, and monitoring of risk exposures.

### **Risk Categories**

The Company's activities expose it to a variety of operational and financial risks such as market risk (which includes interest rate risk and equity price risk), credit risk, foreign exchange risk, fund manager risk, dilution risk, liquidity risk, large transaction risk, non-guarantee, regulatory risk, and operational risk.

**Market Risk:** Market risk is the risk of possible decline in the value of the Fund due to fluctuations in prices of the fund's assets. Since the Fund may invest in both equity and fixed income securities, it is subject to two types of market risks: (1) Interest Rate Risk applicable to fixed income investments of the Fund; and (2) Equity Price Risk applicable to the equity investments of the Fund.

**Interest Rate Risk:** Interest Rate Risk is a type of Market Risk which is applicable to the Fund's investments in bonds, if any. This refers to the increase/decrease of a bond price due to movement in market factors such as changes in interest rates. A change in interest rates is the period when interest rates rise or fall thus causing the decline or increase in the market price of the bonds held by the Fund, if any. This risk is minimized by closely monitoring the direction of interest rates and aligning it with the appropriate strategy of the Fund.

**Equity Price Risk:** For equity investments, changes in prices of equity refer to the equity investments held by the Fund either for strategic or trading purposes. These equity investments, if any, are subject to the daily price fluctuations, as determined by market forces. Hence, prices may vary as a result of the general economic and political conditions, as well as developments in the company's operations and overall profitability. To manage this risk, the equity investments included in the Fund's portfolio are carefully selected based on their fundamental soundness.

**Credit Risk:** Investments in bonds carry the risk that the issuer of the bonds might not be able to meet its interest and principal payments. In which case, the value of the bonds will be adversely affected and may result in a write-off of the concerned asset held by the Fund, resulting to a significant decrease in its NAVPU. To mitigate this risk, each Issuer/Borrower/Counterparty passes through a stringent credit process to determine whether its credit quality complies with the prescribed standards of the Fund. The credit quality of the Issuer/Borrower/Counterparty is reviewed periodically to ensure that excellent credit standing is maintained. Moreover, a 15% exposure limit to a single entity is likewise observed.

**Foreign Exchange Risk:** The Fund is exposed to foreign exchange risk arising from currency exposures primarily with respect to the US dollars. Significant fluctuation in the exchange rates could significantly affect the Fund's financial position. The Fund's financial assets are primarily denominated in the same currencies as its insurance contracts, which mitigate the foreign exchange rate risk. Thus, the main foreign exchange risk arises from recognized assets and liabilities denominated in currencies other than in which the investments of the Fund are expected to be settled.

**Fund Manager Risk:** The performance of the Funds is also dependent on the Fund Manager's skills. Hence, the Fund may underperform in the market and/or in comparison with similar funds due to investment decisions made by the Fund Manager, and may also fail to meet the Fund's investment objectives. The Board of Directors of the Fund, however, shall ensure that all investment policies and restrictions enumerated in this Prospectus are strictly followed.

**Liquidity Risk:** The Fund is usually able to service redemptions of investors within seven (7) banking days after receiving the notice of redemption by paying out redemptions from available cash or cash equivalents. When redemptions exceed these liquid holdings, the Funds will have to sell less-liquid assets, and during periods of extreme market volatility, the Funds may not be able to find a buyer for such assets. As such, the Funds may not be able to generate sufficient cash from its sale of assets to meet the redemptions within the normal seven (7) banking day period. To mitigate this risk, the Fund maintains adequate highly liquid assets in the form of cash, cash equivalents and near cash assets in its portfolio.

**Large Transaction Risk:** If an investor in a Fund makes a large transaction, the Fund's cash flow may be affected. For example, if an investor redeems a large number of units of a Fund, that Fund may be forced to sell securities at unfavorable prices to pay for the proceeds of redemption. This unexpected sale may have a negative impact on the net asset value of the Fund. To mitigate this risk, the Fund may impose single investor limits to the ownership of the fund, when necessary. This limits the extent to which redemptions from any single investor can impact the Fund's cash flow.

**Non-Guarantee:** Unlike deposits made with banks, an investment in the Fund is neither insured nor guaranteed by the PDIC. Hence, investors carry the risk of losing the value of their investment, without any guaranty in the form of insurance. Moreover, as with any investment, it is important to note that past performance of the Fund does not guarantee its future success.

**Regulatory Risk:** The Funds' operations are subject to various regulations, such as those affecting accounting of assets and taxation. These regulations do change, and as a result, investors may experience lower investment returns or even losses depending on what such a regulatory change entails. For example, higher taxes would lower returns, and a mandated precautionary loan loss provisions could result in the Fund experiencing a loss in the value of assets. To mitigate this risk, the Fund adopts global best practices. Further, it maintains regular communications with the relevant government agencies to keep itself abreast of the issues giving them concern, and to have the opportunity to help them set standards for good governance. The Fund's investment manager, SLAMCI, also takes an active participation in the Philippine Investment Funds Association, Inc. ("PIFA"), an association of mutual fund companies in the Philippines.

**Operational Risk:** This is the risk of loss resulting from inadequate or failed internal processes, controls, people and systems. Categories of operational risks may fall under: sales and distribution, human resources, information technology, processes and people, accounting and finance, model risk, legal and regulatory and third party relationships. The Fund ensures that internal controls and practices are consistent with enterprise wide policies supporting the management of operational risks. The Fund has established business specific guidelines. Comprehensive investment program, including appropriate levels of self-insurance, is maintained to provide protection against potential losses.

**Taxation Risk:** Gains realized by investors upon redemption of shares in a mutual fund are not subject to personal income tax (R.A. 8424). However, since the fund will only issue units, investors are advised to consult their own professional advisers as to the tax implications of subscribing for, purchasing, holding, and redeeming units of the Fund.

The above risk factors are by no means exhaustive. New and/or unidentified risks may arise given the fast changing financial markets and economic environment.

### **CLASSIFICATION OF THE FUND INTO HIGH, MODERATE OR LOW RISK INVESTMENT; PROSPECTIVE INVESTORS**

The Fund's investment objective is to generate long-term capital appreciation through a portfolio of equities, fixed income securities and alternative financial instruments, adjusted accordingly as the target date of the Fund (Year 2028) approaches. The Fund is for retail and corporate investors, and is classified as a moderate-risk investment.

### **CONFLICT OF INTEREST POLICY**

The Fund Manager and its employees are prohibited from engaging in fraudulent, deceptive or manipulative conduct. The interests of the Fund and its employees must never conflict with or appear to conflict with those of the Fund and its stakeholders. Where such a situation may arise, the Fund Manager will seek to ensure that all stakeholders are treated fairly, and that Fund Manager employees act in the best interests of each stakeholder.

The Fund Manager and its employees are required to take reasonable steps to identify and disclose existing material conflicts of interest as well as material conflicts of interest that would be expected to arise between the Fund Manager and the Fund. The Fund Manager must respond to such conflicts by avoiding or otherwise controlling the conflict, and by disclosing such conflicts to the Fund.

### **Effect of Existing or Probable Governmental Regulations on the Business**

Senate and congressional bills amending R. A. 2629, which is the main law that regulates the mutual fund industry, have been filed. The most prominent of these are the bills on the proposed Collective Investment Schemes Law ("CISL"). One of the noteworthy provisions of the CISL bills is the exemption of mutual fund companies from certain requirements of the Corporation Code as regards increasing ACS. If passed into law, this would be of possible benefit to the mutual fund companies which, with their numerous stockholders, find it difficult to obtain the votes of stockholders representing at least 2/3 of the outstanding capital stock to approve certain corporate actions. SLAMCI, through PIFA, participates in the hearing and deliberation of the CISL bill. SLAMCI expects the regulatory environment to improve with the passage of the CISL bill to the benefit of investors.

## **MANAGEMENT DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

### **Financial Position as of September 30, 2018**

At incorporation, the Fund had an authorized capital stock of 200 Million common shares with a par value of PHP 0.01 per share.

As of September 30, 2018, out of the present authorized capital of 200 Million shares, the Fund has 50 Million shares issued and outstanding with a par value of PHP0.01 per share.

The Fund is in the process of completing its requirements for the registration of the approved capital stock. Pre-operating expenses incurred amounted to PHP 764,922 which represents filing fees for the registration of shares and professional fees. Pre-operating expenses will be charged to the seed capital under shares and all subsequent expenses will be for the account of the offer units.

The capital structure of the Fund consists of issued capital. The PHP 50,000,000 subscription represents seed capital from Sun Life Asset Management Company Inc.

Subsequent to September 30, 2018, the Company plans to issue redeemable units of participation in accordance with the SEC's policy of allowing investment companies to issue other types of securities other than their own authorized capital stock.

Redeemable units refer to units of participation each of which represents an undivided interest in the pool of investments assets earmarked for this type of security issued by a Mutual Fund Company (MFC). The MFC will buy back the redeemable units upon request of the holder.

The Fund has not yet started commercial operations. For the next twelve (12) months, the Fund is expected to commence official operations as an investment company. In terms of cash requirements, the Fund is currently compliant. It may raise additional funds in the next twelve (12) months as the investor base grows. Income is recognized to the extent that it is probable that the economic benefits will flow to the company and the revenue can be measured reliably. Income is measured at the fair value of the consideration received or receivable and represents amounts receivable for services provided in the normal course of business.

The Fund manages its capital to ensure that the Fund will be able to continue as a going concern while maximizing returns to stakeholders through investments in high-quality debt securities.

The Fund is guided by its investment policies and legal limitations. All the proceeds from the sale of shares, including the original subscription payments at the time of incorporation constituting the paid-in capital, is held by the pertinent custodian banks.

The Fund is also governed by the following fundamental investment policies:

1. It does not issue senior securities.
2. It does not intend to incur any debt or borrowing. In the event that borrowing is necessary, it can do so only if, at the time of its incurrence or immediately thereafter, there is asset coverage of at least 300% for all its borrowings.
3. It does not participate in any underwriting or selling group in connection with the public distribution of securities, except for its own share capital.
4. It generally maintains a diversified portfolio. Asset class and geographic concentrations may vary at any time depending on the investment manager's view on the prospects.
5. It does not invest directly in real estate properties and developments.
6. It does not purchase or sell commodity futures contracts.
7. It does not engage in lending operations to related parties such as the members of the board of directors, officers of the Fund and any affiliates, or affiliated corporations of the company.

9. It does not change its investment objectives without the prior approval of a majority of its shareholders.

### **Top Five Key Performance Indicators**

The performance of a Fund is important to its investors. Oftentimes, it is used when making investment decisions. That is why Key Performance Indicators (KPI), a set of quantifiable measures, is necessary to gauge its performance in terms of meeting the Fund's investment objective while consistently following its investment policy.

#### **I. Total Return**

The performance of a mutual fund is always expressed in terms of its total return, which is the sum of the change in a Fund's Net Asset Value (NAV), its dividends and its capital gains distributions over a given period of time, net of its expenses.

#### **II. Market Conditions**

A Fund's true performance potential needs to be evaluated within the context of the market environment prevailing during the different periods used.

It is most relevant to investors to measure the performance of a fund within a 10-year time frame as it will most likely cover a mix of market conditions that may be translated into a more reliable long-term indicator of the Fund Manager's investment management abilities.

#### **III. Benchmarks**

Benchmarking is one of the most important aspects of a mutual fund's total return performance. A fund's performance metrics only have meaning if they are compared to appropriate "guideposts," or benchmarks.

Given the Fund's objective to invest in a composition of equity securities and/or government and corporate debt securities, its performance is measured against 50% Philippine Stock Exchange Index (PSEi) + 45% Bloomberg Philippine Sovereign Bond Index (BPHILR) + 5% Special Savings Account (SSA).

#### **IV. Peer Comparisons**

Mutual funds are also compared to their peers, or peer groups, and relevant fund categories. For example, it is common for investment research materials to compare a multi-asset/asset allocation fund, like the Sun Life Prosperity Achiever Fund 2028, to funds similar in nature (peers or peer group). While this information is made available to the Fund's investor, the same may be found in the website of the Investment Company Association of Philippines at [www.pifa.com.ph](http://www.pifa.com.ph).

#### **V. Asset Size**

Open-ended mutual funds grow their asset size in two ways:

- Increase in the value of the underlying assets as a result of the strong performance of equity securities and/or bonds in the fund's portfolio. When the underlying assets in a portfolio increase in value, the fund's asset size increases.
- The inflow of investors' money. This is why a fund's asset size will continue to grow even if it has a negative return.

The increase in a Fund's asset size signifies solid fund management skills which combined with favorable market conditions backed by a strong economic outlook illustrates how effectively a fund manager has performed and the extent to which value has been added through active management.

The second indicates investor confidence in the fund manager, the company, or both.

Most analysts check whether the performance of a mutual fund is attributable to personnel who have since left the fund. While there is no magic number when it comes to fund manager tenure, it should provide some investor comfort to know that with respect to the Fund, the Fund Manager and the Fund's top management have been with the Fund for at least 5 years. Furthermore, the company, having been in the business for decades combined with a record of consistent strong performance indicates a stability and resilience capable of withstanding the different stages of the business cycle.

### **CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURES**

There has been no disagreement with Deloitte on any accounting and financial disclosures.

#### **Audit and Audit-Related Fees**

The audit fees for the period ended September 30, 2018 is PHP 104,480.00. These fees pertain to the audit of the financial statements of the Fund in relation to statutory and regulatory filings.

There are no other assurance and related services rendered by the external auditor for the last two fiscal years that are reasonably related to the performance of the audit of the Fund's financial statements.

#### **Tax Fees**

There are no professional services rendered by the external auditor for the last two fiscal years for tax accounting, compliance, advice, planning and any other form of tax services.

## **All Other Fees**

There are no other fees billed by the external auditor for any other products and services for the last two fiscal years.

The Fund's audit and compliance committee reviews the client service plan and service fee proposal presented by the external auditor and recommends such for the approval of the Board of Directors, if found acceptable.
